Art Unit: 2829

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:

I. Claims 18-26, drawn to apparatus, classified in class 250, subclass 492.2.

II. Claims 27-29, drawn to method, classified in class 438, subclass 17.

2. The inventions are distinct, each from the other because:

Inventions I and II are related as product and process of use. The inventions can be shown to be distinct if either or both of the following can be shown: (1) the process for using the product as claimed can be practiced with another materially different product or (2) the product as claimed can be used in a materially different process of using that product (MPEP § 806.05(h)). In the instant case the product as claimed can be used in a materially different process of using that product such as a process that does not measure an electrical characteristic of the wafer using an inversion condition as a reference point.

3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification and recognized divergent subject matter, restriction for examination purposes as indicated is proper.

4. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Art Unit: 2829

5. A telephone call was made to the Office of the Attorney of Record on July 25, 2003 to request an oral election to the above restriction requirement, but did not result in an election being made.

6. A shortened statutory period for response to this action is set to expire one month(s) from the date of this letter. Failure to respond within the period for response will cause the application to become abandoned. 35 U.S.C. 133
